Lose Your Silent Partners

install automatic Pay Points

Seriously, what are you waiting for? Automatic Pay Points deliver so much value so quickly that not using them makes no sense at all. Check out the five reasons that you need to run your car wash with automatic pay points

Our solutions experts have extensive experience working with virtually every point of sale system and management software package available. We understand the strengths and weaknesses of them all and are well equipped to provide guidance that gets you into the best possible situation.

We have assisted our customers and their architects with hundreds of pay point design schemes. We incorporate best practice operational elements into every one and then shape the aesthetics to project and support the brand.

5 Reasons to Use Automatic Pay Points

Instant Cash Security

From the first day, you will have 100% accountability of every transaction no matter how the customer paid.

Reduced Labor

The money you save in labor easily pays for the financing cost of the machines from day one. Total payback is less than 3 years.

Customer Convenience

Customers want payment options. Automatic pay points enhance convenience with cash, credit card, loyalty cards and code. Moreover, they increase the speed of the transaction process with one step high speed electronic payment.

Loyalty Programs

Covering your monthly breakeven on the first day of the month is every car wash operators dream. Loyalty programs like "Unlimited Clubs" with the convenience of RFID readers help you achieve that dream. Take your customer off the street and keep him washing at your place.

Increased Dollar per Car

Payheads always ask for the upsell and allow your customer to use credit cards to pay for it. They simply outperform most service writers and drive up \$/car.
